

OUR NEW PERSONAL BEST.

In Olympic lifting, it's not always about beating the competition. That's why we developed the Competition Series Olympic Bar to exceed our own standards as well. Like using premium steel developed specifically to allow for the perfect amount of whip, and a distinct combination of needle and ball bearings for unprecedented spin. And most importantly, each bar is precision-built exactly to IWF specs right here in our US factory, and then calibrated for accuracy. For more information, visit www.irongrip.com.
