

INTRODUCING THE IRON GRIP MAX DUMBBELL

SAFER. STRONGER. SMARTER.

Available in heavier sizes up to 200 pounds, the MAX[®] dumbbell has a wider 10-inch diameter head, resulting in a more compact form in ultra-heavy sizes.

BETTER BALANCE.

A wider (versus a longer) head centers the dumbbell mass around the handle to improve balance at higher weights.

OPTIMAL BIOMECHANICS.

Innovative compact design allows a greater range of motion for pressing movements and more comfortable lifting overall.

SUPER HEAVY DUTY.

Premium press fit and welded construction, beefy XL[®] Handles, and American-made urethane combine to deliver the most durable heavy dumbbells yet.
